

JCC Named Construction Project Manager for Corporate Office Relocation

BeyondTrust, an international leader in software development, retained the services of Jobin Construction Consultants to manage the construction and relocation of their east coast corporate offices from Portsmouth New Hampshire to N. Andover Massachusetts. Services provided included space evaluation, lease and construction contract negotiations, space design, and construction supervision. We also provided assistance and management of the office furnishings contract and staff relocation efforts.

The new offices include 11,000 s.f. on 2 levels in the East Mill Complex on High Street in N. Andover. Structural modifications for a new interior access stair needed to be made. The design also included the creation of hard and soft offices, conference rooms, research and development space, and a technical support suite. The interior finishes were replaced, electrical power and mechanical systems upgrades were also required.

The project was completed in 45 days.
