

JCC Named Owner's Representative for Renovations To St. Joseph Cathedral in Manchester

Jobin Construction Consultants was hired by the Diocese of Manchester to be their project manager for the structural repairs and exterior renovations to St. Joseph Cathedral in Manchester. This structure has received over \$ 1 million dollars in upgrades, including structural repairs to its wood truss roof, new Inspire synthetic slate roofing, exterior painting, new exterior insulation, and masonry repairs. Large amounts of copper flashing was also used to restore this building to its original beauty.

This project was accomplished using a complex engineered staging system that extended over 175 feet into the city of Manchester's skyline.
