

JCC Retained as Owner's Representative for the Design and Construction of Beach Condominium Project

Jobin Construction Consultants was hired by developers to manage the design and construction of Seaglass Shore Condominiums located at Hampton Beach. These luxurious units were designed and constructed to take advantage of the sweeping oceanfront and harbor views. Each oversized 2 bedroom unit includes high end finishes, covered balconies, and underground parking to exceed the buyer's expectations. A roof top deck also provides buyers with their own private unobstructed views of the beach and harborside.
