

JCC Named Construction Consultant for Mount Zion Christian School in Manchester

Jobin Construction Consultants was hired by Mount Zion Christian School to provide construction project management and coordination services for their total building renovation project.

Mount Zion recently purchased the old Highland School building on Titus Ave in Manchester. The building, which was once a school, had since been renovated in to an office building. Our job was to turn the building back into a first class private school facility. Duties included, construction code and design coordination, local approvals and permitting, solicit subcontractor pricing, on site construction coordination and supervision.

Design work was provided by Dennis Mires, The Architects. Many of the original school building features were restored to their original condition as well as the upgrade of the entire building to meet state and local codes. The project was completed on a fast track to enable the building to be completed prior to the start of the fall class schedule.
